CLOUD BATHTUBS: HYDROMESSAGE SYSTEM

Whirlpool System :

Mixed air and water flow out of the directionable jets, which direction may be adjusted and intensity can varied to stimulate the blood and lymphatic circulations. The pulsating whirlpool function alternates softer to a more dynamic massage, similar to the sensations. Given by these a waves.

Airpool System :

Air bubbles are released from the air nozzles positioned at the bathtub bottom, for a delicate caressing massage. The pulsating whirlpool function alternates softer to a more dynamic massage, similar to the sensations given by the sea waves.

Make in India initiative :

Driven by make in India initiative, we at cloud have decided to design and develop range of wellness products e.g. waterfall bathtub, showers, faucets, steam generator of high quality, suitable to Indian environment condition.

Features :

loud bathtubs can be equipped with taps and fittings installed on the tub rim with manual or other mostatic mixer, water inlet or inlet with overflow. The cloud wellness experience can be completed by some comfort able head rests, underwater light or chromo therapy and, on some models.

Quality & Environmental Care :

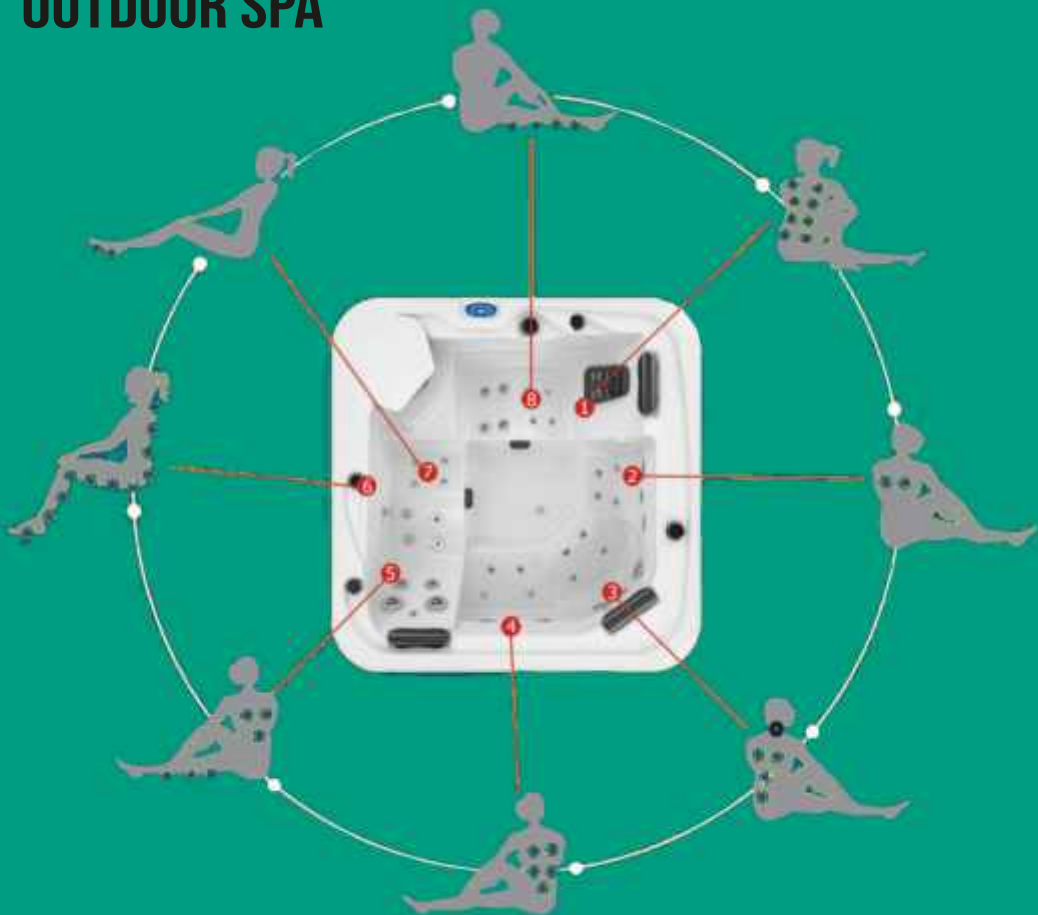

Cloud bath tubs are out of coextruded material: a high quality and durable material, easy to clean and maintain . our products are green by definition, as our production process allows there cycling of the scratches thus reducing the environmental impact.

Hygiene :

Cloud hydro massage bathtubs are fitted with an exclusive system, blowing after, Which empties their lines of any residual water by blowing air through the system after the bath tubh as been drained, thus offering maximum hygiene. When required cloud bathtubs are equipped with a semiautomatic disinfection programme for cleaning the nozzles and the whirlpool circuit with a sanitizing liquid filled into a special tank.

OUTDOOR SPA

CONFURE

Size : 2100x2100x950 mm

Features :

Air Regulator | Digital Control Panel | Head Rest
Underwater Lighting | Ozoniser | Four Sides Skirting
Radio | Four Side Skirting | Blue tooth

Seating :

Capacity	-	3 + 2 Lounge
Weight - Dry/ Filled	-	450 Kg/1600 Kg
Water Capacity	-	1150 Ltrs
Head Rest	-	3 Pcs

Material :

Shell Material	-	Sanitary Ware Acrylic with Fibre Glass Reinforcement
Colour	-	White
Support Frame	-	SS 304
Slip Resistant textured bottom		

Pump

Jets pump 2 HP	-	2 Nos
Circulation Pump 1 HP	-	1 Nos
Online Heater 3 Kw	-	1 Nos

Jets Configurations :

Jets Total	-	45 Jets
7.5 Inch Massage Jet	-	2
5.0 Inch Massage Jet	-	4
3.5 Inch Massage Jet	-	20
2.0 Inch Massage Jet	-	10
1.0 Inch Massage Jet	-	10

CALLISTA

Size : 1800x1800x900 mm

Features :

Air Regulator | Digital Control Panel | Head Rest
Underwater Lighting | Ozoniser | Four Sides Skirting
Radio | Four Side Skirting | Blue tooth

Seating :

Capacity	-	3 + 2 Lounge
Weight - Dry/ Filled	-	295 Kg/1169 Kg
Water Capacity	-	874 Ltrs
Head Rest	-	3 Pcs

Material :

Shell Material	-	Sanitary Ware Acrylic with Fibre Glass Reinforcement
Colour	-	White
Support Frame	-	SS 304 Slip Resistant textured bottom

Pump

Jets pump 2 HP	-	2 Nos
Circulation Pump 1 HP	-	1 Nos
Online Heater 3 Kw	-	1 Nos

Jets Configurations :

Jets Total	-	45 Jets
7.5 Inch Massage Jet	-	2
5.0 Inch Massage Jet	-	4
3.5 Inch Massage Jet	-	20
2.0 Inch Massage Jet	-	10
1.0 Inch Massage Jet	-	10

CEMECH

Size : 1980x1915x864 mm

Features :

Air Regulator | Digital Control Panel | Head Rest
Underwater Lighting | Ozoniser | Four Sides Skirting
Radio | Four Side Skirting | Blue tooth

Seating :

Capacity	-	4 + 2 Lounge
Weight - Dry/ Filled	-	315 Kg/1169 Kg
Water Capacity	-	875 Ltrs
Head Rest	-	3 Pcs

Material :

Shell Material	-	Sanitary Ware Acrylic with Fibre Glass Reinforcement
Colour	-	White

STEAM & SAUNA

Steam :

Steam bath is an ancient bath popular with Greeks & Romans. It is a restorative concept of steam, to revive our overall health and enhance appearance. A steam bath is a refuge where you can unwind and let everyday care melt away amid clouds of steam. After a long tiring day of work there is nothing like spending some time in a steam bath enclosure. You feel completely relaxed each time you take a steam bath as the soft comforting embrace of the warmth & high humidity massages the skin increasing the blood circulation and gently easing tense muscles. The steam penetrates deep into your skin cleansing & leaving it soft & smooth so you are wonderfully refreshed invigorated in both body & soul, long after your bath is over. It is highly beneficial for skin. The moist heat stimulates the subcutaneous blood flow & cleanses the skin intensively. Opening the pores, removing dead skin & impurities and leaving the skin feeling soft, clean & smooth. The detoxifying effect of steam can be enhanced by using it along with the very organic technique of aroma therapy where essential oils are kept exposed in the steam room to release their naturally beneficial essences to the steam bath.

Physiological effects :

The body tries to increase its heat loss through all possible avenues- especially the skin & lungs. If the environmental temperature exceeds that of the body, the only way to lose heat is through sweating. The body cannot maintain a constant temperature when the environment temperature is as high as that reached in a steam bath or sauna, and so the body temperature begins to rise. As the cutaneous circulation increases, the body from the environment accepts heat more readily. The rise in body temperature depends mainly on the temperature and humidity content of the steam bath, the sweating capacity of the bather, and the bathing time. Body temperatures have been found to range from 37.6°C (99.6°F) to 40°C (104°F), thus the physiological changes that occur during the bath are due, in part, to the rise in body temperature and in part, to the influence of the reflexes of the hormonal and nervous systems, which attempt to increase the heat loss.

Effects of a steam bath :

A steam bath is health giving as well as enjoyable. Warm and gentle heat of steam bath relaxes your body. It melts away the extra fats. It soothes tense and strained muscles. It cleans dirt from body & keeps the complexion fresh & invigorating. Provides sound sleep at night a steam bath is especially recommended to alleviate the conditions listed below by virtue of its high steam content and the general benefits of moist heat. The list was confirmed by the research carried out by the Institute of Medical Balneology and Climatology at the University of Munich for bronchial asthma, bronchitis, catarrh of the upper respiratory tract, coughs, hoarseness, painful movements of the joints. A great advantage of the steam bath lies in its highly beneficial effect on the skin, a feature particularly appreciated by women. The moist heat stimulates the subcutaneous blood flow and cleanses the skin intensively, opening the pores, removing dead skin and impurities and leaving the skin feeling soft, clean and silky smooth.

Sauna :

Restore your well-being and get the golden glow of health by creating your very health sanctuary in the privacy of your home. Sauna, the "finish" way of relaxation is now at your disposal. The concept of sauna originated in Finland about 2000 years ago. Originally it was a pit dug into aslope. Over the years it transformed into a cabin with fire place. The simple heat generation process has a stounding benefits. The soft heat created has a gentle penetrating and moisturizing effect. Perspiration in anon-polluted and healthy atmosphere eliminates harmful toxins and metabolic wastes from the body, consequently improving body's metabolism. A retreat to this exclusive haven promotes physical and mental replenishment. Sauna may provide some relief to patients with asthma and chronic bronchitis and may also all aviate pain and improve joint mobility in Patients with rheumatic diseases. Sauna does not cause drying of skin and may even benefit patients with psoriasis. It may reduce the incidence of the common cold and temporarily relieve the symptoms. Regular saunas combined with exercise therapy can efficiently clear organic chemicals, drugs and heavy metals from the body. Sauna improves micro circulation and blood supply to constricted areas. It also stimulates the production of harmones.

Benefits:

Ease joint pain and stiffness saunas can ease the joint pain, muscular - skeletal ailments, muscle and tissue injuries with its penetrating heat properties. Removes toxins and mineral waste sweating in sauna can help to detoxify the body of harmful impurities, heavy metals, acids, sodium, nicotine, alcohol and many more substances. Improves skin conditions saunas increase blood and nutrient supply to the capillaries through increased blood circulation which leaves the skin glowing and fresh after the infrared sauna session. The expulsion of toxins also help to keep the skin looking youthful and vibrant. The sauna may also relieve acne and give improved skin tone, colour and elasticity. Strengthens the immune system when the body's core temperature increase s an artificial fever is induced. As the body thinks it has a fever its production of white blood cells increases, improving the body's over all resistance to foreign viruses. Reduces stress and fatigue when sitting back in the radiant heat of the sauna, stress and tension melts away. After a session in sauna, you will feel refreshed, renewed and rejuvenated. Enjoy a bath a bath with flowing colours. Shower enclosures with a variety of vivid colors upload that contact of coloration in your bath -time to create a dreamy series, the colors match the color of the faucets and other textures in your tub space, creating a mesmermerizing and symmetrical environment.
